

Pintail Technologies Opens Austin Office

Pintail Technologies Expands in Key Regional Market

Austin, Texas (May 29, 2006) - Pintail Technologies, a breakthrough semiconductor test solutions provider based in Plano, Texas, announced today that it is opening a satellite office in Austin, Texas. The office will initially be staffed by eight Austin-based employees currently on the Pintail team. Keith Arnold, Pintail Technologies' CTO (and former president of The Boxer Group) will head up this site as the Austin general manager.

"We are very pleased and excited to be opening a Pintail office in Austin" stated Keith Arnold. "This is an important regional market for us as well as a recognized center for technical talent. Personnel located in the Austin office will include development engineering and applications engineering, as well as worldwide marketing and sales functions."

"This is an important milestone for us as we expand our central Texas presence," said Taylor Scanlon, president and CEO of Pintail. "Austin has strong ties to the semiconductor industry with several larger IDM's and fabless companies and many smaller IC companies striving to grow. Our real-time ability to adaptively optimize the throughput and quality of testing complex semiconductor chips is truly unique and goes far beyond traditional analysis methods used to date. Pintail Technologies can help effectively manage the cost of test for any sized company."

The address for the new office is: 5511 Parkcrest Suite #110, Austin, TX 78731 near the intersection of MoPAC and Hwy 2222.

About Pintail Technologies

Pintail Technologies is a semiconductor test improvement company that provides breakthrough software to reduce the cost of test and increase production output and quality through existing test equipment and programs. Pintail has created the first test improvement solutions to combine real-time test process control capabilities with innovative analytical programs in an integrated software suite designed for speed and accuracy. Fabless and integrated device manufacturers worldwide, in collaboration with leading assembly and test suppliers, use Pintail tools to increase competitive advantage and improve customer responsiveness. More information on the company and its solutions is available at www.pintail.com.
